

Website Theme Switch

The purpose of this webpage is to customize basic theme settings of the website based on your preference. This page also generates your preferred printing color options to save as a pdf file or print pages (this website) from your printer. This is to enable you better web accessibility and readability options as you download, browse and visit pages. Each choice gives you a preview of foreground and background colors applied to this page as an indicator. Upon your choice, the relevant theme will be downloaded to your local drive changing the previous theme settings for your future visits.

Toggle Mode

Click the button to toggle between dark and light mode for this page. You may apply a color mode for dark or light setting through the following table to all pages.

Toggle dark mode

Color Generator

Pick a color for your preferred foreground and background webpage color:

 Mode Color Set	RGB Output
<input type="radio"/> Default	<input type="checkbox"/>
<input type="radio"/> Black	<input type="checkbox"/>
<input type="radio"/> White	<input type="checkbox"/>
<input type="radio"/> Red	<input type="checkbox"/>
<input type="radio"/> Purple	<input type="checkbox"/>
<input type="radio"/> Teal	<input type="checkbox"/>
<input type="radio"/> Blue	<input type="checkbox"/>
<input type="radio"/> Custom Enter an RGB value between (0, 0, 0) for Black, and (255, 255, 255) for White.	<input type="text" value="0"/> <input type="text" value="0"/> <input type="text" value="0"/> : Background <input type="checkbox"/> <input type="text" value="255"/> <input type="text" value="255"/> <input type="text" value="255"/> : Foreground <input type="checkbox"/> <input type="text" value="255"/> <input type="text" value="255"/> <input type="text" value="255"/> : Headers <input type="checkbox"/> Same As Foreground Color: <input type="checkbox"/> <input type="checkbox"/> <input type="button" value="Custom Preview"/> <input type="button" value="Reset Form"/>

Download & Apply

 **Note on file download target:**  1- When prompted, choose **Save As**. 2- Overwrite **rgb.css** file with the same filename from: 3- The **<stylesheets>** folder within the **<site>** folder to view changes.

Header Preview

Section Preview

This is the expected RGB result for the page text. Hover over this cell to view the background color.
